

# Measuring an OPW 2100/OPW 2105 Spill Container for a Liner

5523 Baggett Marysville Rd  
 Oroville, Ca 95965  
 Ph: 530.534.3966  
 Fax: 530.534.7404  
 www.dpm-llc.com

The "Tang" is located near the top of the container and will usually have the pull chain for the drain valve attached to it.

Dim "A" is from the bottom of the container to the bottom of the "Tang"

Dim "B" is the inside diameter of the snow plow ring

Dim "C" is the inside diameter of the container at the bottom

**Select One:**

Check here for OPW 2100

Check here for OPW 2105

Reference (PO, location, etc): \_\_\_\_\_

**This form to be completed, signed and dated then faxed to DPM with your purchase order.**

**Fax to 530.534.7404**

I have read and understand the Application Bulletin for OPW 2100/OPW 2105 Spill Container Liners.

DPM holds no responsibility for liners when containers are not measured correctly. If you are unsure as to how to measure the container or it appears that the container is damaged or distorted in any way contact the factory for assistance. By signing this document you are authorizing DPM to Manufacture a liner to the above dimensions.
